

GNF Pellets

Product Information

Gut Nutrition Formula

GNF is a mineral feed which is combination of minerals, amino acids and a prebiotic which have a role in general metabolism and are required for normal feed conversion. It should be used to complement the feed of horses.

It is suitable for feeding:

To maintain digestive function.

To horses with depressed appetites, weight loss, or exhibiting stable vices such as cribbing or wind sucking.

Instructions for Proper Use:

GNF should be added to the normal feed ration.

All Horses: Feed 50 g twice daily.

Foals, Yearlings & Ponies: Feed 25 g twice daily.

Pack Size: 3kg
