

InsectDog Mini

with insect protein

Because insects are a source of protein that is not used very often, our InsectDog Mini is the solution for mini dogs that suffer from a food intolerance. Valuable fatty acids help make for healthy skin and a shiny coat. The hypoallergenic and grainfree recipe is not only suitable for sensitive pooches, but also for all four-legged pioneers: insects are THE sustainable protein source of the future!

grainfree recipe

This recipe does not contain any grain and is suitable as a daily grainfree food for healthy and sensitive dogs.

skin & coat

Valuable fatty acids, vitamins as well as zinc and copper in an easily absorbable, organically bound form ensure an extra shiny coat and healthy skin.
